

## Minelab Mine detectors

 [Download presentation Minelab Mine detectors Evals compressed \(1.3 MB\)](#)

### [Minelab Single Transmit Multiple Receive](#)

Time domain electromagnetic induction (Multi Period Sensing – Bi-Polar) Magnetic Influence Mine resistant

### [Minelab F Series Charger](#)

Reducing operating costs by using rechargeable batteries is often difficult for many demining organisations

### [Minelab F3 Mine Detector](#)

The Minelab F3 Mine Detector incorporates all the features of Minelab's unique, proven and highly renowned Multi Period Sensing technology into Minelab's new BiPOLAR technology.

### [Minelab F1A4 Mine Detector](#)

The F1A4 incorporates Minelab's unique and highly successful Multi Period Sensing to achieve unsurpassed performance for any demining or countermine operation.

### [Why Purchase Minelab](#)

Minelab metal mine detectors can be found in service in more than 55 countries around the world. Ideal for use in both military and humanitarian demining operations, Minelab detectors continue to be purchased by NGOs, commercial demining companies, the United Nations and individual nation state militaries.
